How to Disable or Take Down Your Student Webpage

0) Keep a copy of your CV and/or other important files (e.g., PDFs) you stored in your public_html folder on ejectable media (thumb drive) or via non-UW online source you can access later.

1) Go to: https://uwnetid.washington.edu/manage/

2) Login with your uwnetid

3) From the menu on the left, select Computing Services

4) Under Active Services, check the box for Web Publishing, then

5) Click on the Unsubscribe button

You may be asked to confirm you want to unsubscribe to Web Publishing.

These steps should deactivate your student webpage; however, you should double-check via a browser (e.g., Firefox) to ensure it is actually deactivated by attempting to access it.

Once you have done this, please notify Sandra Coke, sjcoke@uw.edu, and she will remove your name from the dept main website.
